

THE PUREST HEART

PARKER

(she/her)

I was inspired to create this work because I was drawn to the colors and I wanted to dip my toes into some lighting practice. I was motivated to participate in the Magnify Voices Expressive Art because it seemed like a great message and something many people could share their feelings about.

This piece depicts an angel statue, dipped halfway in water, who longingly gazes at a stone heart. The heart represents unrequited longing and yearn for something you can't quite reach. For example, the angel is a stone statue, who reaches for a heart. However, the angel can never have a heart because it's stone and stone can't feel.
